## ABOUT THIS SESSION

Private credit has rapidly moved from a distress product to a mainstream source of corporate funding in India, with deployment touching \$12.4 billion across 166 transactions in 2025 and AUM estimated at \$25–30 billion. This webinar maps where India's funding gaps lie, examines how private credit funds structure and price these deals, and assesses what new competition from banks and regulatory shifts mean for the market's next phase. It offers both borrowers and investors a clear view of the opportunity and its terms.
